

For Immediate Release

Mountain View Physical Therapy Adds the AlterG® Anti-Gravity Treadmill® to Help Patients Rehab Faster and Athletes Train Like the Pro's

November 19, 2009, Evergreen, Colorado – Mountain View Physical Therapy is pleased to now offer AlterG's innovative Anti-Gravity Treadmill for athletic training and rehabilitation programs.

AlterG's technology developed by NASA and tested by Nike, is different from other fitness and therapeutic equipment because it defies gravity by applying a lifting force to the body that reduces weight on the lower extremities. Unlike other un-weighting methods, the AlterG enables athletes to train with their natural gait and rhythm, and can significantly shorten the time required for patients to recover from injury or surgery.

"We are very excited to provide this new technology to our patients and fitness clients," stated Valerie Gluth, physical therapist and owner of Mountain View Physical Therapy. "Not only will this provide an effective treatment program for people needing physical therapy, such as those recovering from surgeries where full-weight bearing exercises are not permitted, but we are now also a resource locally here in Evergreen for our high-performance athletes looking to enhance their training."

Numerous Olympians who trained for the 2008 games in Beijing proved the AlterG's effectiveness this summer, including several runners recovering from injuries. In addition, dozens of professional sports teams and universities, and numerous performance enhancement facilities also rely on the AlterG for world class training.

AlterG's Anti-Gravity Treadmill allows a person to train longer, minimize stress on the joints, and exercise at a higher level of intensity. This type of therapy is also beneficial to patients suffering from arthritis, lower extremity fractures, knee replacement surgery, joint problems, strokes, neurological and balance disorders, and many other conditions.

"The AlterG is being adopted nationally by leading hospitals and rehabilitation clinics and we are excited to see Mountain View Physical Therapy and Pilates as one of those leading the way," said Lars Barfod, CEO of AlterG. "AlterG is committed to helping leading physical therapists provide world class care to their communities, and we are very pleased to be working with Mountain View Physical Therapy to accomplish this goal."

For more information or to schedule a session for the AlterG Anti-Gravity Treadmill®, contact Mountain View Physical Therapy at 303.674.7889. A demonstration video is available on the company's website at www.corestrengthforlife.com. Patients are encouraged to ask their physicians if the AlterG is an appropriate treatment option.

ABOUT MOUNTAIN VIEW PHYSICAL THERAPY

Mountain View Physical Therapy, owned by Valerie Gluth, P.T., is an independent outpatient physical therapy practice. Specializing in orthopedic manual therapy and Pilates-based exercises for both rehabilitation and fitness, Valerie's clinic provides spinal evaluation and treatment, peripheral joint rehabilitation, post-surgical rehabilitation of spine and extremities, treatment for sport-related injuries and nerve pathology, among other rehabilitation vehicles. Mountain View Physical Therapy and Pilates also now offers fitness assessments and training equipment for high-performance athletic training.

Additionally, the scan and fit for custom orthotics is a specific service of Mountain View Physical Therapy. Valerie Gluth has attended and participated in many seminars and conferences across the country in connection with orthotics fitting and fabrication, with advanced clinical training in Biomechanics and Orthotics.

Owner, Valerie Gluth, was appointed a Board Member for five years for the national Private Practitioner Physical Therapist network, and served a two-year term as Board Member for the local Colorado Private Practitioner Physical Therapist network. Valerie is a Member of the American Physical Therapy Association.

ABOUT ALTERG

AlterG, Inc. manufactures and distributes the AlterG® Anti-Gravity Treadmill®, a revolutionary technology for rehabilitation and athletic training. AlterG is great for anyone who wants to reduce impact during exercise or have a smooth rehabilitation after surgery or injury, and is preferred and used by leading medical professionals and the world's best athletes and teams. AlterG's unique anti-gravity technology was originally developed at NASA and tested at Nike's Oregon Research Project by America's top distance runners and is the only FDA-cleared device of its kind. Located in Silicon Valley, AlterG is now selling Anti-Gravity Treadmill's worldwide. For more information visit www.alter-g.com or contact the company at info@alter-g.com
